So this schedule is a little different than normal. You will notice two times on some of the names, These are for budgeting reasons. There are always exceptions to the rules but here it goes: If it is slow you need to finish your part of closing and get clocked out by the latest time on the schedule. This does not mean you can leave before finishing your duties, but I need you to try your hardest to clock out on time as possible. I am asking for your help on this please. This is budgeted on a projection of how busy we might get next week. So if we get busier of course there will be a little more flexibility in the schedule. But if we stay slow then no exceptions. If anyone has any suggestions on quicker process for closing or if there is anything I can do to help let me know. THANK YOU!!! I appreciate you all!!!
